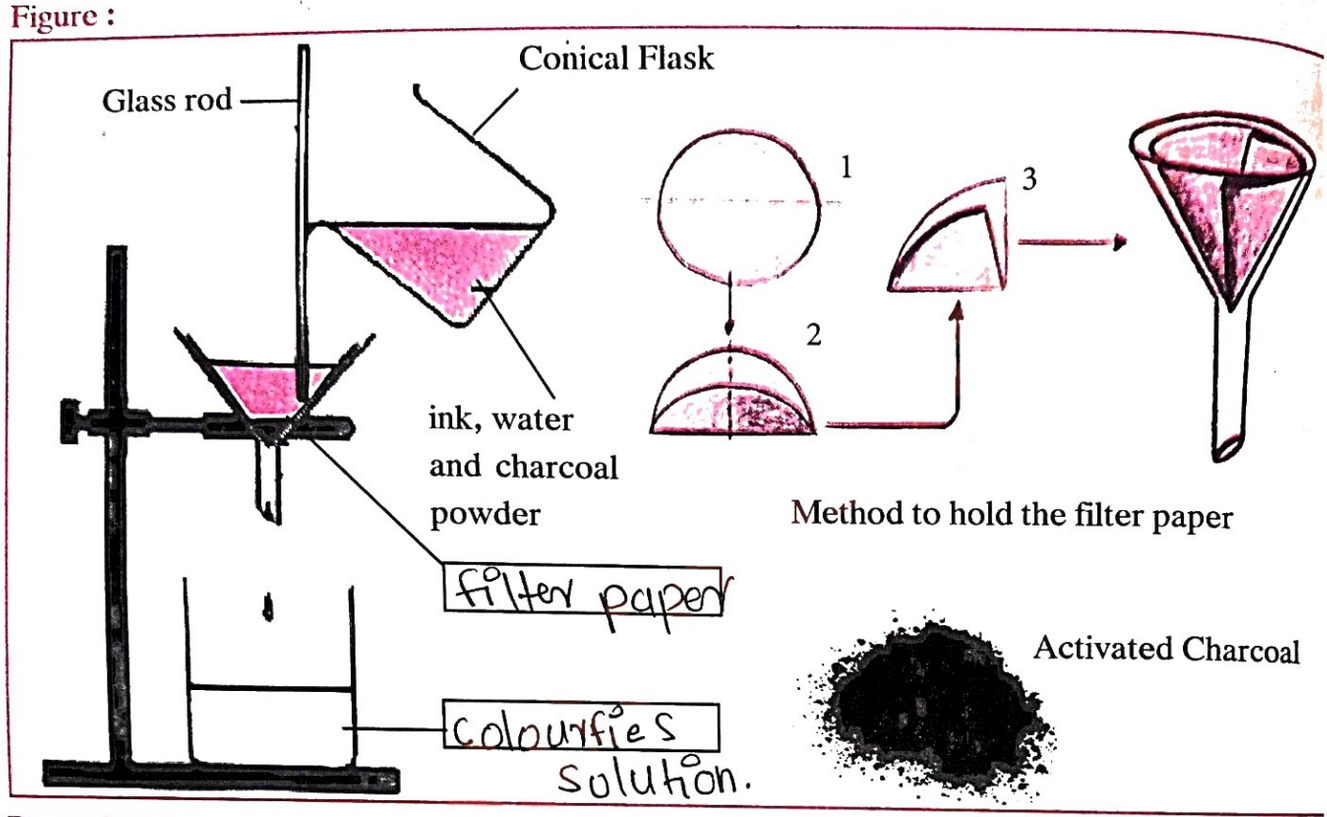
Experiment No.11

Title : To determine that the activated charcoal is a decolourising agent.

Apparatus : Two beakers, Glass rod, aqueous solution of ink etc.

Chemicals : Activated charcoal, aqueous solution of ink etc.

Figure :



Procedure :

1. Take some aqueous solution of ink in a beaker and add some activated charcoal powder in it.
2. Warm the solution.
3. Fold the filter paper as shown in the figure, and place it of the funnel.
4. Place the funnel on the stand as shown in the figure, and pour the solution along the glass roc on the filter paper.
5. Filter the above solution. Collect the filtrate in a beaker. Observe the filtrate.

Observation : Nature of the filtrate collected in beaker filter a conited in Beaker colaures, oderless, liquid is colourless it in indicators that altidue charged as use colour.

Inference :

The Actpuated charcoal is Dicorising agent.

Multiple choice questions

1. The residue in the above experiment is.....
   A. Ink B. Water C. Charcoal D. Charcoal with colour
2. The decolourising property of charcoal is used for.....purpose.
   A. Paper production B. Cloth production
   C. Water purification D. Petroleum Purification
3. The reason behind pouring the solution on the filter paper with the help of glass rod is.....
   A. to increase the rate of filtration B. to prevent taring of filter paper
   C. to stick the charcoal to the glass rod D. different than these
4. ..... is the highest grade, while .....is the lowest grade coal.
   A. Bituminous B. Peat C. Lignite D. Anthracite

Questions

1. What are the uses of activated charcoal in everyday life?

coal:- coal a fassical fuel, it cantains carbon nitrogen and oxygen it also contains nitrogen and phosphate and sulphere it accures in the solid water use of coal is used in laundries & factories in home, etc

2. For which purpose activated charcoal is used in the field of medicine? Why?

Activated can coal is used in the emergency treament of certain kinds of poissing it helps prevent the poison from being absorbed serval the stomach into the body some times serval activated char coal are used for medded to treat server poisoning.
