

10. Urbanisation

Std 9th

Sub – Geography

Q 1. Suggest measures for the following problems:

(A) The slums in the cities are increasing.

Ans. (i) The migration of people from villages and less-developed regions is the cause of increasing slums.

(ii) The ideal solution to this problem is to stop migration by making available employment opportunities at the local level. Thus, people will not migrate in search of employment.

(iii) Slum Rehabilitation Authority (SRA) and the other government agencies should expeditiously complete the housing schemes for the low income group.

(iv) The nationalised and cooperative banks should make available housing loans to middle class to enable them to purchase their house.

(B) Because of the increasing traffic jams within the city, lot of time is consumed in commuting.

Ans. (i) People living in the suburban and outer areas of the city are required to commute for different reasons.

(ii) Many travel by private vehicles as public transport is inadequate.

(iii) A huge number of private and public vehicles congest roads and cause traffic jams.

(iv) This problem could be solved by improving public transport system and car pooling system.

(v) The traffic control machinery should be made more effective.

(C) The question of law and order in the urban areas is serious.

Ans. (i) When people do not get employment, they resort to illegal ways to earn money. This creates problem of law and order.

(ii) Many crimes are due to poverty and unemployment. Poverty alleviation and employment generation programmes should be given priority.

(iii) The semi-literate/educated unemployed person should be given skilled training and be prepared for self employment.

(iv) The gangs of criminals should be destroyed as they induce the unemployed person to indulge in criminal activities.

(v) The police and Judicial system should be strengthened to wipe out criminals.

(D) The problem of pollution is grave because of urbanisation.

Ans. (i) Increasing industrialisation, very large number of vehicles and irresponsible behaviour of people cause pollution.

(ii) To check pollution, Pollution Control Acts should be rigorously enforced.

(iii) Strict action should be taken against polluting industrial units.

(iv) Installation and regular use of affluent water treatment plant should be made compulsory.

(E) Migration has created questions of health and education in urban areas.

Ans. (i) Air pollution, water pollution, and noise pollution are the realities/problems of the urban areas.

(ii) The polluted environment is the cause Of many health problems and it needs to be controlled.

(iii) The public health system needs to be strengthen.

(iv) People need to be educated in personal and public hygiene.

Q 2. Match the correct pairs :

- (1) Technological development and mechanisation - **Urbanisation**
- (2) Permanently staying away from your original place - **Migration**
- (3) 75% males are engaged in non-agricultural occupation - **Urban areas**
- (4) The problems of solid waste - **Lack of planning**

Q 3. Outline the importance/ advantages of the following:

(A) Technology and mechanisation

Ans. The following are the advantages of mechanisation and technology

- (i) The use of technology has increased in agriculture. Mechanisation has also increased.
- (ii) In rural areas, agriculture is done with the help of machines on a large scale these days.
- (iii) The manpower employed in agriculture became devoid of agricultural work.
- (iv) This working class came to cities to look for work. As a result, urban population started increasing.

(B) Trade

Ans. (i) A place in a region is sometimes favourable in terms of transport, loading unloading and storage of a goods.
(ii) This leads to development of trade and related services
(iii) Because of trade business complexes, banks, credit societies, godowns, cold storages, houses, etc. start growing.
(iv) For example, Nagpur in India is centrally located in India. Urbanisation started increasing here because this location facilitated trade.

(C) Industrialisation

Ans. (i) The development and concentration of industries in a region is a factor contributing towards urbanisation.

(ii) Increase in industries leads to increase in the hopes of people who are attracted towards these industries from surrounding areas.

(iii) This increases the speed of urbanisation. In the 19th century, Mumbai grew rapidly because textile mills started on a large scale in Mumbai. Many villages, which were originally fishing villages (koliwadass), became part of Mumbai metropolitan area because of industrialisation and urbanisation.

(D) Amenities in urban areas

Ans. (i) Various amenities and facilities develop in urban areas because of urbanisation. Transportation, communication, educational and medical facilities, fire brigade, etc. are very important.

(ii) Because of good transportation facilities, journey becomes easier. Its positive effect is also seen on freight transport, markets, trade, etc.

(iii) Many students come to urban areas especially to access the services of higher education like Pune city. Medical facilities are also well developed in urban areas.

(iv) To avail of these facilities, many patients and their family members come from different parts and stay for short periods.

(E) Social harmony in the cities

Ans. (i) There is an increase in secondary, tertiary and quaternary occupations with urbanisation. Hence economic activities increase.

(ii) These areas grow rapidly. Cultural and social customs and traditions are exchanged as people from different parts live together in the cities. This creates social harmony.

Q 4. Compare the following and give examples:

(A) Transportation system and traffic jams

Ans. (i) As cities grow, people start living in the outskirts and suburbs of the city.

(ii) People commute from the suburbs to the centre of the city for businesses and industries, trade, jobs, education, etc.

- (iii) Public transportation system is not sufficient and hence the number of private vehicles increases.
- (iv) This leads to an increase in traffic jams and travelling time increases significantly.

(B) Industrialisation and air pollution

- Ans.** (i) Industrialisation leads to development and concentration of industries in and around cities like Mumbai.
- (ii) Industries use different types of energy and machines to undertake production.
- (iii) Many Industries let off smoke in the air and cause air pollution.
- (iv) Increase in the development of city, paucity of facilities and breaking of law, makes pollution a big problem.

(C) Migration and slums

- Ans.** (i) Because of urbanisation, the population in cities increases rapidly. But the housing facilities do not increase in the same proportion as the population.
- (ii) Most of the migrated people are economically weak. They cannot afford the housing offered in the cities.
- (iii) They build temporary and semi-structured houses in open spaces.
- (iv) The density of houses is very high. Roads are narrow. There is a lack of basic facilities.

(D) Amenities and increasing crime rate

- Ans.** (i) The people who have migrated people do not always find employment in the cities.
- (ii) Some of them look for means to earn money through illegal ways.
- (iii) This leads to an increase in the crime rate of the cities. Thefts, burglaries, scuffles and murders are the crimes that happen in the cities.
- (iv) This leads to serious law and order issues bringing pressure on the police and judicial system.

Q 5. Complete the table :

Process of urbanisation	Effects
Emergence of slums	Illegal settlements Insufficient facilities
Migration	Increase in population because of attraction of good lifestyle of cities. Migration can be for short-term or long-term
Pollution	Adverse effect on urban life
Industrialisation	Employment opportunities were generated. Increase in amenities and facilities
Change from rural to urban	Formation of municipal council, development of occupations, better civil amenities

Q 6. Explain:

(A) The growth of cities takes place in a specific method.

Ans. (i) With the emphasis on rural development, rural industrialisation is given priority.

(ii) People from surrounding regions come to work and thereby the population of the village increases.

(iii) To full fill their needs medical facilities, food services, hospitals, recreation services also develop.

(iv) Consequently, the extent Of the village grows and the form Of earlier village changes.

(v) The place Of Gram Panchayat is taken by the municipal council or municipal corporation.

(vi) These urban bodies provide better civil amenities, undertake town planning and develop recreation facilities, parks and places of tourist interest. In this manner, a village transforms into a town or a city.

(B) A planned city of your imagination

Ans. (i) In planned cities, the residential area, the commercial area and the area providing services like education and health are clearly demarcated.

(ii) Keeping in view the future growth of city, various civil amenities are also planned.

(iii) The recent concept of 'Smart City' proposes planned development of existing cities and new cities.

(iv) In the city of my dream, the needs of housing, recreation health, education and public transport will be met.

(v) Chandigarh, New Delhi and Navi Mumbai are similar to a planned city of my imagination.

(C) Industrialisation causes cities to develop.

Ans. (i) The development and concentration of industries in a region is a factor contributing towards urbanisation.

(ii) Increase in industries leads to increase in the hopes of people who are attracted towards these industries from surrounding areas.

(iii) This increases the speed of urbanisation. In the 19th century, Mumbai grew rapidly because textile mills started on a large scale in Mumbai. Many villages, which were originally fishing villages (koliwadass), became part of Mumbai metropolitan area because of industrialisation and urbanisation.

(D) Pollution- A problem

Ans. (i) Pollution is a major problem in the cities. It has adverse effects on urban life.

(ii) Air pollution, noise pollution and water pollution are clearly visible.

(iii) Increase in the development of the city, paucity of facilities and breaking of laws makes pollution a big problem. As cities grow, pollution also increases.

(E) Swachchh Bharat Abhiyan

Ans. (i) 'Swachchh Bharat Abhiyan' is an ambitious programme launched by the government of India in 2016.

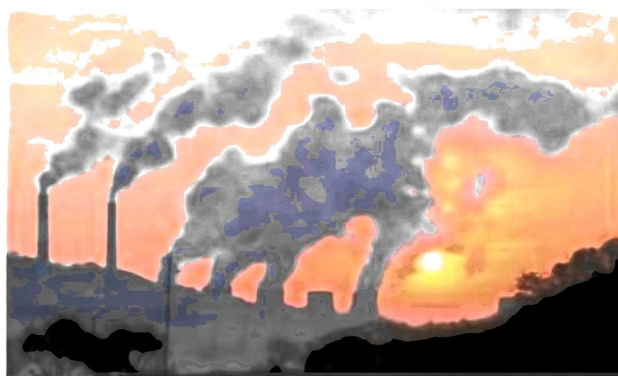

(ii) It proposes to stop the prevailing practice Of going for defecating in the open area by providing public toilets.

(iii) It encourage the families to have private toilet i.e. in the house.

(iv) For this purpose, special grant is made available to the Gram Panchayat.

(v) The funds for this programme are raised 'swachh bharat surcharge.'

Q 7. Suggest measures for the following problems of urbanisation shown in the following pictures.

Ans. This picture depicts the problem of air pollution. The remedies suggested are as follows :

(i) Shifting of industries causing large scale air pollution to other places.

(ii) Control over the number of public and private vehicles.

(iii) Compulsory check of air pollution test of the vehicles.

- (iv) Make it obligatory to use low lead petrol.
- (v) Vigorous implementation of the prevention of air pollution.

Ans. This picture depicts noise pollution. The remedies suggested are as follows :

- (i) Restriction on the use of loud speakers.
- (ii) Fixing the time on the use of loud speakers.
- (iv) Ban on playing music at the places of celebration.
- (v) Ban on the use of DJ during processions.

Ans. This picture depicts the problems arising out of inadequate arrangement for the disposal of garbage. The remedies suggested are as follows :

- (i) Segregation of wet and dry waste must be made compulsory.
- (ii) Involvement of the local NGO's in the management of disposal waste.
- (iii) Encouragement of the cooperative societies to dispose green/wet waste into compost fertilizers.

(iv) Efficient planning and execution of the collection of dry/solid waste by the local government.

Ans. This picture depicts the problem of water pollution. The suggestions to solve this problem are as follows:

- (i) Strict punishment to the industries which dispose polluted water in different sources of water.
- (ii) Ban on washing clothes, taking bath and washing animals at public water sources.
- (iii) Build public toilets to stop people from defecating in open near rivers.
