

Chapter 3: Exogenetic Processes Part - I

Note: Refer to textbook diagrams/activities where necessary.

Q. 1 Try this : (Textbook page 26)

Do the experiment as shown in Figure 3.5 given on page 26 of the textbook and answer the following questions in words/sentences :

1) Did the colour of the water change?

Yes, the colour of water changed to white.

2) What happened to the chalk?

Chalk got dissolved in the water.

Q. 2 Try this : (Textbook page 26)

Do the experiment as shown in Figure 3.6 given on page 26 of the textbook and answer the following questions in words/sentences :

1) Are there any stains on the cloth?

Yes, there are some stains on cloth.

2) Which colour are they?

They are reddish/brown in colour.

3) What could be the reason for the stains?

As the cloth is wet, reddish/brown rust must have formed on the iron nails wrapped in it. This could be the reason for the stains.
