

Chapter 7 – International Date Line

Q. 1. With the help of an atlas, examine the following routes of travel and find out whether they cross the International Date Line or not :

No.	Routes	Crossing IDL?
1	Mumbai – London – New York – Los Angeles	Yes
2	Tokyo – Delhi – Kolkata – Singapore – Melbourne	No
3	Kolkata – Hong Kong – Tokyo – San Francisco	Yes
4	Chennai – Singapore – Tokyo – Sydney – Santiago	Yes
5	Delhi – London – New York	No

Q. 2. Study the table given below and answer the following questions :

Refer to the table given in the textbook.

(1) On which day will the Samoa Islands (Apia) be on 1st January 2017?

Ans: Samoa Islands (Apia) will be on Saturday.

(2) Which place in the USA will be the last to welcome 2017?

Ans: Baker Island (USA).

(3) Which place in the USA will welcome 2017 on Saturday?

Ans: Baker Island will welcome 2017 on Saturday.

(4) What could be the reason behind the change in the day?

Ans: The change in day occurs due to difference in time zones and crossing of the International Date Line. Sydney is ahead of India while London is behind India.

Q. 3. Study the tables given below and answer the following questions :

Refer to the tables given in the textbook.

(1) What day will it be at Greenwich when it is 12 noon at the starting point according to Table A?

Ans: Wednesday.

(2) What day will it be at Greenwich when it is 12 noon at the starting point according to Table B?

Ans: Friday.

(3) What could be the reason behind the different answers in Table A and Table B?

Ans: Both crossed the International Date Line. While crossing westward one day is added and while crossing eastward one day is subtracted.

(4) How many days will be required to travel around the world according to Table B?

Ans: 3 days – Wednesday, Thursday and Friday.

(5) Which answer is correct? Why?

Ans: Both are incorrect. The correct answer is Thursday because proper adjustment of date is required while crossing the International Date Line.

Q. 4. Study the following ticket and answer the questions :

Refer to the ticket given in the textbook.

(1) From where will the plane take off and where will it land?

Ans: The plane will take off from Tokyo (Japan) and land at San Francisco (USA).

(2) What is the duration of the flight?

Ans: The duration of the flight is 9 hours 15 minutes (non-stop).

(3) Write the date and time of departure and arrival.

Ans: Departure – Friday, 1st April, 12:30 a.m. (Tokyo)

Arrival – Thursday, 31st March, 5:45 p.m. (San Francisco)

(4) What information is given on the ticket about the date?

Ans: "This flight involves a date change."

(5) Why is this information given?

Ans: This information is given because the flight crosses the International Date Line and hence the date and day change.

(6) Does the plane cross the International Date Line? In which direction?

Ans: Yes, the plane crosses the International Date Line while travelling eastward.

(7) What change takes place when the International Date Line is crossed?

Ans: The day and date change when the International Date Line is crossed.
