

Chapter 3 : Physiography and Drainage

Q.1 Study the following map and answer the following questions in words/sentences :

Space for India Physical Map

1. In which direction does the region with an altitude of more than 6000 m lie in India?

Answer: The region with an altitude of more than 6000 m lies in the North and North-East of India.

2. Look for the south flowing river in the peninsular region. In which river basin does it lie?

Answer: Pranhita is the south flowing river in the peninsular region. It lies in the Godavari River Basin.

3. In which direction is the slope of the region in the north shown in dark green?

Answer: The slope of the region in the north shown in dark green is towards the east.

4. Make a list of plateaus located in between Aravali Ranges and Chhota Nagpur Plateau.

Answer:

- Mewar Plateau
- Malwa Plateau
- Bundelkhand Plateau

5. Name the peaks shown in the Eastern Ghats.

Answer:

- Mahendragiri
- Malayagiri

6. Which mountains demarcate the deep plains of Brahmaputra?

Answer: The Eastern Himalayas demarcate the deep plains of Brahmaputra.

7. Give the relative location of the Nilgiri Hills.

Answer: The Nilgiri Hills are located at the junction of the Western Ghats and the Eastern Ghats.

8. In which direction does the height of the Sahyadri Hills increase?

Answer: The height of the Sahyadri Hills increases towards the south.

9. The Vindhyas act as a water divide between which two river basins?

Answer: The Vindhyas act as a water divide between the Narmada River Basin and the Ganga River Basin.

Q.2 Can you tell? (Textbook page 16)

Study the map of India given in Q.1 and answer the following questions in words/sentences :

Space for India Physical Map

1. In which direction do the Aravalis lie?

Answer: The Aravali ranges lie in the north-east to south-west direction.

2. Aravali ranges act as a water divide between which rivers?

Answer: The Aravali ranges act as a water divide between the Luni River and the Sabarmati River.

3. Name the hills located on the plateau to the east of Aravalis.

Answer: Vindhya Hills and Satpuda Hills.

4. Across which states has the Deccan Plateau spread?

Answer: Maharashtra, Karnataka, Telangana, Andhra Pradesh and Tamil Nadu.

5. Which hill ranges lie to the west of the Deccan Plateau?

Answer: The Western Ghats (Sahyadri).

6. Enumerate the characteristics of the Western Ghats.

Answer:

1. The Western Ghats run parallel to the western coast of India.
2. They are higher than the Eastern Ghats.
3. They form a continuous mountain range.

4. They act as a major water divide.

7. Compare the Eastern Ghats and the Western Ghats.

Eastern Ghats	Western Ghats
They are discontinuous.	They are continuous.
Lower in height.	Higher in height.
Rivers cut across them.	Very few gaps are found.

8. Why are the Western Ghats called a water divide?

Answer: The Western Ghats separate the east-flowing rivers from the west-flowing rivers. Hence, they are called a water divide.

Q.3. Make friends with maps! (Textbook Page 15)

Study the following map and answer the following questions in words/sentences:

Space for Brazil Physical Map

1. What is the range of altitude of Amazon river basin?

Answer:

The range of altitude of Amazon river basin is from 0 metres to 200 metres.

2. Between which two highlands is the Amazon river basin located?

Answer:

The Amazon river basin is located between the Guyana Highlands and the Brazilian Highlands.

3. Observe the region with the altitude 500 to 1000 metres. Describe the locational extent of this region shown in yellow with reference to direction.

Answer:

The region shown in yellow represents the Brazilian Highlands. It covers most of the eastern and southern parts of Brazil.

4. Besides the Amazon river basin, where else do you find regions with an altitude of less than 200 metres?

Answer:

Besides the Amazon river basin, regions with an altitude of less than 200 metres are the Pampas, Paraguay Basin, and the eastern and northern coastal regions.

5. Describe the plateau region with height of 200 to 500 metres through which tributaries of Amazon flow in your own words.

Answer:

The highlands gradually slope towards the north and are not very steep. Tributaries of the Amazon River, such as the Xingu River, flow through this region and form rapids and waterfalls.

Q.4. Study the map of Brazil given in Q.2 and answer the following questions in words/sentences:

1. What is the range of altitude of Pantanal region?

Answer:

The range of altitude of the Pantanal region is between 80 metres and 150 metres.

2. What is the range of altitude of Guyana Highlands?

Answer:

The range of altitude of the Guyana Highlands is between 600 metres and 900 metres.

3. How much is the height of Pico De Neblina peak?

Answer:

The height of Pico De Neblina peak is 3014 metres.

4. Name the low lying region in the southernmost part of Brazil.

Answer:

The low lying region in the southernmost part of Brazil is the Pampas.

Q.5. Study the following map and complete the following tables:

Space for India's River and Lake Map

1. Complete the following table showing important lakes located in various states of India:

Answer:

States	Important Lakes
Rajasthan	Sambhar Lake
Maharashtra	Lonar Lake
Kerala	Vembanad Lake
Tamil Nadu	Pulicat Lake
Andhra Pradesh	Kolleru Lake
Odisha	Chilika Lake

2. Complete the following table showing major rivers flowing from various states of India:

Answer:

States	Major Rivers
Jammu and Kashmir	Gilgit, Shyok, Indus, Chenab
Gujarat	Sabarmati, Mahi
Maharashtra	Tapi, Godavari, Manjara, Bhima, Krishna, Wardha
Madhya Pradesh	Narmada, Son, Ken, Chambal, Sind
West Bengal	Damodar, Hugli, Subarnarekha
Arunachal Pradesh	Dibang, Subansiri, Brahmaputra

3. Complete the following table showing major rivers with their source:

Answer:

River	Source
Yamuna	Yamunotri
Ganga	Gangotri
Narmada	Amarkantak
Tapi	Multai
Godavari	Trimbakeshwar
Bhima	Bhimashankar
Krishna	Mahabaleshwar
Kaveri	Brahmagiri

Q.6. Study the following map and answer the following questions in words/sentences:

Space for Brazil Rivers Map

(1) In which direction does the river Amazon flow?

The Amazon River flows in the east direction.

(2) Which river flows from the northernmost region of Brazil?

Amazon River flows from the northernmost region of Brazil.

(3) Which river flows from the southernmost region of Brazil?

Uruguay River flows from the southernmost region of Brazil.

(4) Name the rivers meeting the North Atlantic Ocean.

Amazon, Xingu, Araguaia and Tocantins rivers.

(5) Name the rivers meeting the South Atlantic Ocean.

Jequitinhonha and Pousguyach rivers.

(6) Name the tributaries of river Amazon.

Purus, Madeira, Juruaka, Paru, Branco, Negro, Japura and Jurua rivers.

Q.7. Mark the following on the given outline map of India. Give Index:

(A) Physiographic divisions:

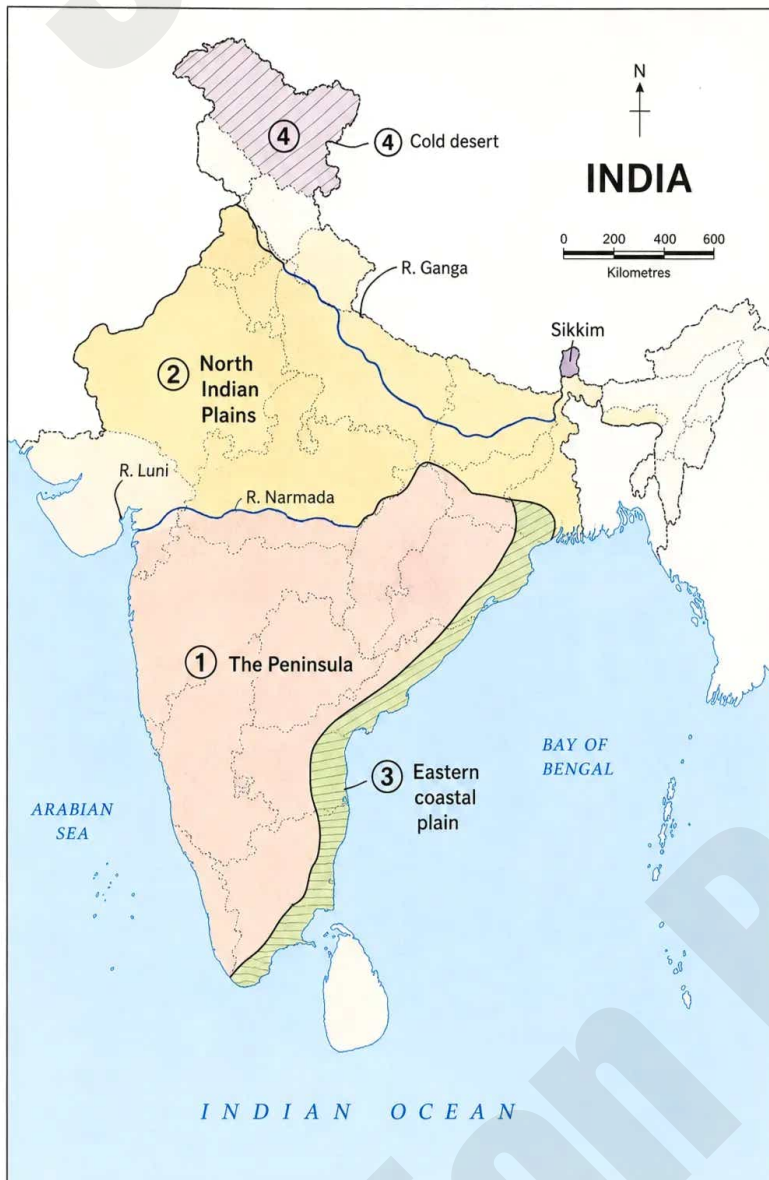

1. The Peninsula
2. North Indian Plains
3. Eastern Coastal Plain
4. Cold Desert

(B) Rivers:

1. Ganga
2. Luni
3. Tungabhadra
4. Narmada

(C) Places:

1. Sikkim

Q.8. Mark the following on the given outline map of Brazil. Give Index:

(A) Physiographic divisions:

1. Guyana Highlands
2. The Great Escarpment
3. Major Islands
4. Pantanal Wetland
5. Drought Quadrilateral

(B) Rivers:

1. Amazon

2. Purus
3. Uruguay

(C) Locations:

1. Pico-De-Neblina – Highest peak in Brazil
2. Caatinga
3. Casino Beach

Q.9. Observe map given in Q.1 and map given in Q.3 and fill in the following table with the physiographic divisions found in the following States of India and Brazil respectively:

States of India	Physiographic Divisions	States of Brazil	Physiographic Divisions

Jammu and Kashmir	Himalayas	Roraima	Highlands
Uttar Pradesh	Plain Region (Ganga Basin)	Para	Amazon River Basin
Rajasthan	North Indian Plain	Goiias	The Plains
Maharashtra	Maharashtra Plateau	Mato Grosso do Sul	Swampy Land
Kerala	Coastal Plains	Rio de Janeiro	Escarpment
Odisha	Coastal Plains	Amazonas	Mountains, Plains
Arunachal Pradesh	Mountains, Rivers	Amapa	River Basin
