

Chapter 6 : Population

Q.1. Study the following map and answer the following questions in words/sentences:

(1) Name the states with highest population density.

Answer:

Uttar Pradesh, Bihar, West Bengal, Kerala and Andhra Pradesh.

(2) Name the states with lowest population density.

Answer:

Jammu and Kashmir, Himachal Pradesh, Uttarakhand, Arunachal Pradesh, Nagaland, Rajasthan, Madhya Pradesh and Chhattisgarh.

(3) Classify the distribution of population in India in the following table:

Answer:

Sr. No.	Population Density (per sq. km.)	Name of the States / Union Territories
1.	Less than 100	Mizoram, Arunachal Pradesh, Sikkim, Jammu and Kashmir, Himachal Pradesh, Uttarakhand.
2.	101 to 250	Chhattisgarh, Meghalaya, Manipur, Nagaland.
3.	251 to 500	Maharashtra, Goa, Karnataka, Telangana, Andhra Pradesh, Odisha, Madhya Pradesh, Gujarat, Rajasthan, Jharkhand, Assam.

Sr. No.	Population Density (per sq. km.)	Name of the States / Union Territories
4.	More than 501	Bihar, West Bengal, Kerala, Tamil Nadu, Uttar Pradesh, Punjab, Haryana, Delhi, Chandigarh, Puducherry, Daman and Diu, Dadra and Nagar Haveli, Andaman and Nicobar Islands.

(4) Correlate the climate and physiography of India with its population distribution and write a note on it.

Answer:

Climate and physiography of India affect its population distribution. In India, the population is sparsely distributed in mountains, hilly regions, regions of heavy rainfall and desert areas.

Q.2. Make friends with maps! (Textbook page 39)

(1) In which area is population greatly concentrated?

Answer:

Population is greatly concentrated in the states of Sao Paulo and Rio de Janeiro as well as in the southeastern coastal regions.

(2) In which area is the distribution of population sparse?

Answer:

In the Amazon River Basin located in the northern region near the Equator in Brazil.

(3) Identify the type of map showing distribution.

Answer:

Dot Method.

(4) Name any one state in the north having low population.

Answer:

Roraima.

(5) Name any one state/region with very dense population.

Answer:

Sao Paulo.

(6) Comment upon the nature of population in coastal region.

Answer:

Population is very dense in the coastal region.

Q.3. Study the following graphs and answer the following questions in words/sentences.

(1) Mention the year since which the sex ratio of Brazil has been considerably increased.

Answer:

2001.

(2) Mention the year since which the sex ratio of India has been slightly increased.

Answer:

1991.

(3) What was the sex ratio of India in 2011?

Answer:

947 females per 1000 males.

Q.4. Study the following graphs and answer the following questions in words/sentences.

(1) Using the graph, find whether there is the difference between the males and females of various age groups.

Answer:

Yes. There is a difference between the male and female population in various age groups.

(2) In which age group is this difference the maximum?

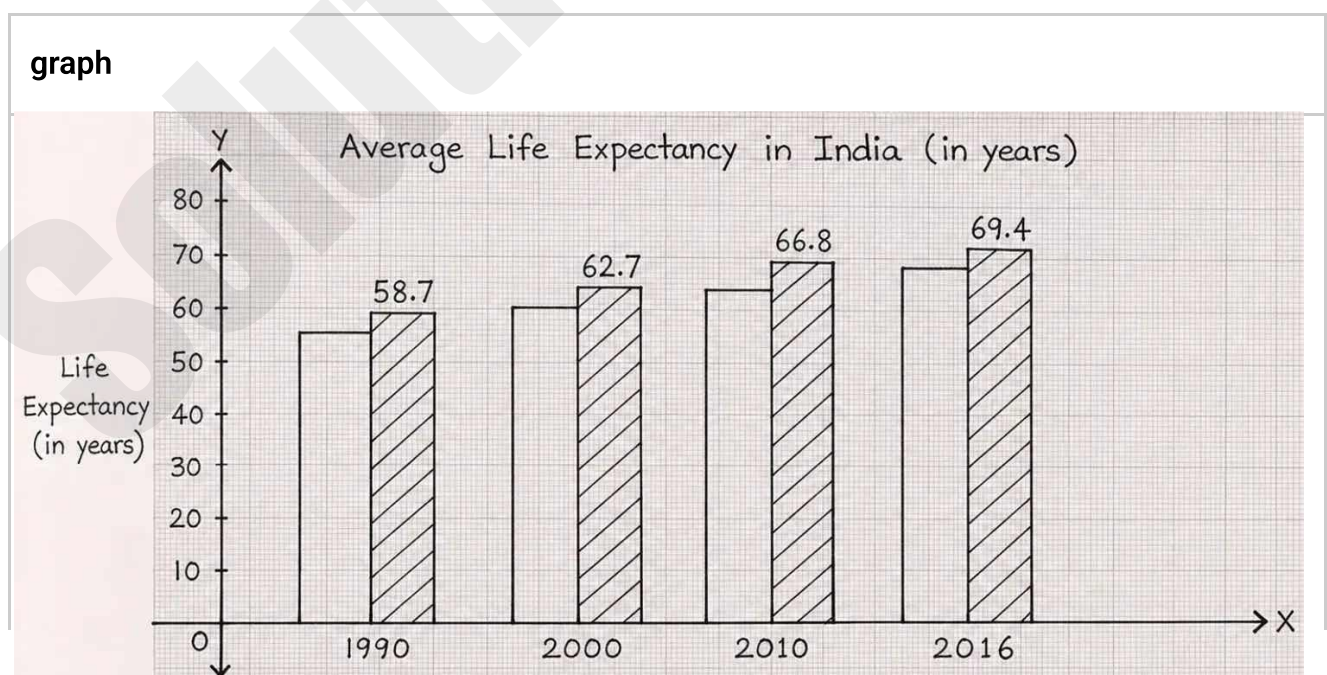

Answer:

Brazil: 10–14 years, 75–79 years, 80–84 years and 85–89 years.

India: 0–4 years, 5–9 years, 10–14 years, 15–19 years, 20–24 years, 25–29 years and 90–94 years.

Q.5. Prepare a multiple bar graph and write the answers.

Answer:

(1) What was the average life expectancy in India in 2010?

Answer:

The average life expectancy in India in 2010 was **67 years**.

(2) In which decade is the increase in the life expectancy of both the countries the same?

Answer:

In the decade **1990–2000**, the increase in the life expectancy of both the countries was the same.

(3) What conclusions can you draw after reading the graph of life expectancy in both countries?

Answer:

Brazil's life expectancy was higher than India's in all the given years. The life expectancy of both countries increased over time, showing improvement in the health and living conditions of the people.

Q.6. Study the following graphs and answer the following questions.

(1) Which country's population growth rate has declined considerably?

Answer:

Brazil's population growth rate has declined considerably.

(2) Which country's population growth rate has declined slightly?

Answer:

India's population growth rate has declined slightly.

(3) What was the population growth rate of India in 2011?

Answer:

The population growth rate of India in 2011 was **1.57%**.

Q.7. Study the following graphs and answer the following questions.

(1) Which country's population has a lower life expectancy?

Answer:

India has a lower life expectancy.

(2) Which country's life expectancy has increased remarkably?

Answer:

Brazil's life expectancy has increased remarkably.

(3) In which decade has life expectancy in India increased rapidly?

Answer:

Life expectancy in India increased rapidly during the **1990–2000** decade.

(4) What was the life expectancy in India in 2016?

Answer:

The life expectancy in India in 2016 was **68 years**.

Q.8. Study the following graphs and answer the following questions.

(1) Mention the decade in which the literacy rate of India increased considerably.

Answer:

The literacy rate of India increased considerably during the **1991–2001** decade.

(2) What was the literacy rate of India in 2016?

Answer:

The literacy rate of India in 2016 was **72.2%**.

Q.9. Mark the following on a given outline map of India. Give Index.

(A) Any two states having the density of population less than 100 persons per sq. km.

(B) Any two states having the density of population between 251 to 500 persons per sq. km.

(C) Any two states having the density of population more than 500 persons per sq. km.

graph

Ans.

**Q.10. Mark the following on a given outline map of Brazil.
Give Index.**

(A) Any two states having the density of population less than 50 persons per sq. km.

(B) Any two states having the density of population between 101 to 150 persons per sq. km.
